

Physical Fitness Test 1.5-mile Training Program for ADVANCED Runners - 12 Weeks

This plan is recommended for Advanced runners looking to improve their time in the 1.5-mile portion of the Air Force Physical Fitness Test. Training for all other portions of the test would need to be accomplished above and beyond training for the run.

Notes:

¹ Conversational Pace is being able to run at a pace where you could say 1-2 sentences while running with little strain in your breathing pattern. This is less accurate than using your Heart Rate to determine pace but is easier to assess while running.
² Using Heart Rate to determine pace is fairly accurate and is preferred. Take 220 - your age and that would be your max heart rate. Take the percentage specified and multiply it to get the heart rate range you should be training in. For example, for a 30-year-old, take 220-30 and get 190. Multiply 190 by 0.65 to get 123.5. Then multiply 190 by 0.70 to get 133. This person is looking at a range pretty close to 123-133 beats per minute.

³ To determine 'EASY' pace, look at the chart attached.

⁴ To determine 'R' pace or Repetition pace, look at the chart attached.

⁵ To determine 'T' pace or Interval pace, look at the chart attached.

⁶ To determine 'T' pace or Threshold pace, look at the chart attached.

⁷ To determine 'F' pace or Fast pace, look at the chart attached.

Week	PHASE	Weekly Plan (weeks start on Sunday's and end on Saturday's)	Quality Workout #1	Quality Workout #2
1	Base (aerobic conditioning that will be critical for later weeks)	<p>To determine how much to run (rate each factor 1 to 3): #1 assess your fitness level: 1 is 'out-of-shape' and 3 is 'very fit'; #2 how much you've run in the last couple of weeks: 1 is 'little/none' and 3 is 'a lot'; #3 your risk for injury: 1 is 'high' and 3 is 'low'. If you score: 8-9, RUN a total of 120 minutes; 6-7, RUN a total of 90 minutes; 3-5, RUN a total of 60 minutes. Whichever group you start in week 1, stay in that group through week 16.</p> <p>1. If you're running 60 minutes, do the following activities 3-4 days this week: a) Run 20-30 minutes, 2-3 days; intensity should be conversational¹ or 65-70% of max heart rate²; b) Bike/Elliptical for 45 minutes 1-2 days; intensity should be 65-70% of max heart rate²</p> <p>2. If you're running 90 minutes, do the following activities 4-5 days this week: a) Run 20-35 minutes, 3-4 days; intensity should be conversational¹ or 65-70% of max heart rate²; b) Bike/Elliptical for 45 minutes 1-2 days; intensity should be 65-70% of max heart rate²</p> <p>3. If you're running 120 minutes, do the following activities 5-6 days this week: a) Run 30-40 minutes, 3-4 days; intensity should be conversational¹ or 65-70% of max heart rate²; b) Bike/Elliptical for 45 minutes 1-3 days; intensity should be 65-70% of max heart rate²</p>	None	None
2	Base (aerobic conditioning that will be critical for later weeks)	<p>1. Do the following activities 3-4 days this week: a) Run 20-35 minutes, 2-3 days; intensity should be conversational¹ or 65-70% of max heart rate²; run a total of 63-66 minutes this week; b) Bike/Elliptical for 45 minutes 1-2 days; intensity should be 65-70% of max heart rate²</p> <p>2. Do the following activities 4-5 days this week: a) Run 20-35 minutes, 3-4 days; intensity should be conversational¹ or 65-70% of max heart rate²; run a total of 95-99 minutes this week; b) Bike/Elliptical for 45 minutes 1-2 days; intensity should be 65-70% of max heart rate²</p> <p>3. Do the following activities 5-6 days this week: a) Run 30-45 minutes, 3-4 days; intensity should be conversational¹ or 65-70% of max heart rate²; run a total of 127-132 minutes this week; b) Bike/Elliptical for 45 minutes 1-3 days; intensity should be 65-70% of max heart rate²</p>	None	None
3	Base (aerobic conditioning that will be critical for later weeks)	<p>1. Do the following activities 3-4 days this week: a) Run 20-40 minutes, 2-3 days; intensity should be conversational¹ or 65-70% of max heart rate²; run a total of 70-73 minutes this week; b) Bike/Elliptical for 45 minutes 1-2 days; intensity should be 65-70% of max heart rate²</p> <p>2. Do the following activities 4-5 days this week: a) Run 25-40 minutes, 3-4 days; intensity should be conversational¹ or 65-70% of max heart rate²; run a total of 105-109 minutes this week; b) Bike/Elliptical for 45 minutes 1-2 days; intensity should be 65-70% of max heart rate²</p> <p>3. Do the following activities 5-6 days this week: a) Run 25-40 minutes, 4-5 days; intensity should be conversational¹ or 65-70% of max heart rate²; run a total of 140-145 minutes this week; b) Bike/Elliptical for 45 minutes 1-3 days; intensity should be 65-70% of max heart rate²</p>	None	None
4	Base (aerobic conditioning that will be critical for later weeks)	<p>1. Do the following activities 3-4 days this week: a) Run 20-40 minutes, 2-3 days; intensity should be conversational¹ or 65-70% of max heart rate²; run a total of 76-80 minutes this week; b) Bike/Elliptical for 45 minutes 1-2 days; intensity should be 65-70% of max heart rate²</p> <p>2. Do the following activities 4-5 days this week: a) Run 30-40 minutes, 2-3 days; intensity should be conversational¹ or 65-70% of max heart rate²; run a total of 115-120 minutes this week; b) Bike/Elliptical for 45 minutes 1-2 days; intensity should be 65-70% of max heart rate²</p> <p>3. Do the following activities 5-6 days this week: a) Run 30-40 minutes, 3-4 days; intensity should be conversational¹ or 65-70% of max heart rate²; run a total of 155-160 minutes this week; b) Bike/Elliptical for 45 minutes 1-3 days; intensity should be 65-70% of max heart rate²</p>	For one of your runs this week, do a 1-mile Time Trial as fast as you can on a track or flat road (ensure the distance is accurate), if possible. This will be used to determine your fitness level for future workouts. After you complete the 1-mile Time Trial, look at the pace chart attached and identify the specific level you will be working from based on your time. All workouts from now until the next time trial will be run at this level. Do 10 minutes before and after.	None
5	Repetition (begin incorporating quality running in preparation for the next phase)	<p>All Groups: On Monday or Tuesday, do Quality Workout #1. On Thursday, Friday or Saturday, do Quality Workout #2.</p> <p>1. Run a total of 84-94 minutes this week. On days <u>other than</u> Quality Workouts, do: a) Bike/Elliptical 1-2 days for 45 minutes (65-70% of max heart rate² intensity); b) 15-30 minute run (EASY³ intensity) to fulfill any remaining minutes.</p> <p>2. Run a total of 127-132 minutes this week. On days <u>other than</u> Quality Workouts, do: a) 40 minute run (EASY³ intensity); b) Bike/Elliptical 1-2 additional days for 45 minutes (65-70% of max heart rate² intensity); c) 15-35 minute run (EASY³ intensity) to fulfill any remaining minutes.</p> <p>3. Run a total of 171-176 minutes this week. On days <u>other than</u> Quality Workouts, do: a) 45 minute run (EASY³ intensity); b) Bike/Elliptical 0-2 additional days for 45 minutes (65-70% of max heart rate² intensity); c) 2-3 20-35 minute runs (EASY³ intensity) to fulfill any remaining minutes.</p>	On track or flat, accurately measured road, do: 10 minutes of easy running Group 1 & 2 do 3, Group 3 do 4 sets of: 1. 200m at 'R' pace ⁴ with 200m jog recovery 2. 400m at 'R' pace ⁴ with 400m jog recovery 10 minutes of easy running 30-40 minutes of total running	On track or flat, accurately measured road, do: 8-10 minutes of easy running Group 1 & 2: 6 x 400m at 'T' pace ⁵ with 1 min jog recovery Group 3: 7 x 400m at 'T' pace ⁵ with 1 min jog recovery 7-10 minutes of easy running 30-40 minutes of total running

Physical Fitness Test 1.5-mile Training Program for ADVANCED Runners - 12 Weeks
